EXPERIENCE

FullStack Developer

Jan 2024 – Present

Dsmart - Worked on **Oncare360 Healthcare platform**.

Hyderabad, India

Set Up Infrastructure & Deployment

- Integrated **CI/CD pipeline** for smooth and faster deployment and hosted the project on **AWS EC2 instances**.
- Configured **Liquibase** for automating database migrations through pull requests.

Optimized Monitoring & Performance

- Migrated application monitoring from **Datadog** to **Grafana** and **Prometheus**, reducing monitoring costs by **70%**.
- Implemented **Redis** caching for quick access to frequently requested data, improving response time

Enhanced Communication & Collaboration

- Integrated **WebSocket** to enable real-time group chats between care teams and healthcare personnel.
- Integrated VoIP call routing for seamless communication between care teams and patients.

Billing System Improvements

- **Automated billing** processes using **SQS** and **AWS Lambda** to perform eligibility checks.
- Developed bulk billing functionality allowing the upload of Excel files to S3, where Lambda checks row constraints and eligibility before generating bills, resulting in a 60% increase in billing efficiency by reducing manual effort and processing time.

Also worked on integrating **Twilio**, **Streamchat**, **Auth0**

PROJECTS

SecureSketch

- Developed a **real-time collaborative whiteboard**.
- Implemented **WebSocket-based live editing** with synchronized **cursor tracking** for seamless multi-user interactions.
- Utilized **monorepo architecture** to optimize code sharing, streamline deployment, and improve maintainability.
- Designed a **scalable backend** with **PostgreSQL**, **Prisma**, and **Express** to support concurrent collaborative sessions.
- Integrated **GitHub Actions** for CI/CD, ensuring automated testing, linting, and deployment workflows.

Tech Stack: Next.js, TypeScript, Fabric.js, Zustand, Zod, WebSockets, Express.js, Node.js, PostgreSQL, Prisma, GitHub Actions, Monorepo (Turborepo)

SkyScanner - Flight Search and Booking Backend

- Developed a scalable backend for flight search and booking using a microservices architecture
- Implemented robust error handling, optimized indexing, and deadlock resolution to enhance system performance and reliability.
- Utilized Sequelize ORM with MySQL to ensure data integrity, scalability, and optimal database performance.

Tech Stack: Node.js, Express.js, MySQL, Sequelize

Pet Market place

- Developed dynamic e-commerce interfaces using **Angular**, with real-time **Firebase authentication** and authorization integration for enhanced user experience.
- Built scalable and secure **NestJS** APIs, integrated **GraphQL** for optimized data fetching, and managed databases with **Prisma** and **PostgreSQL**.
- Integrated **Stripe** for secure payments, ensuring seamless online transactions.

Tech Stack: Angular, NestJS, PostgreSQL, Prisma, Firebase, GraphQL, Stripe, Cloudways.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML/CSS

Frameworks: Angular, React, Next.js, Node.js, Express.js

Developer Tools: Git, GitHub, Docker, Postman, VS Code, monorepo(Turborepo), AWS(EC2, Auto-Scaling Groups, S3, Lambda, SQS, ECR,)

Libraries: Zod

Databases & ORMs: MongoDB, MySQL, PostgreSQL, Prisma, mongoose, sequelize

APIs & Authentication: RESTful APIs, GraphQL, WebSockets, JWT, OAuth.

EDUCATION

Nalla Malla Reddy Engineering College

BTech in Electronic and Communication — 7.34 CGPA

Hyderabad, India

2019 - 2023
